DGT Quality Management Framework

DGT Mission:

to provide the European Commission with high-quality translation and other language services

Quality:

the degree to which a set of characteristics fulfils stated or implied needs and expectations (ISO 9000)

Terminology Framework

Terminology is an integral and crucial part of the translation process, necessary to achieve high-quality translation.

Terminology alone does not make translation good, but it is impossible to imagine a good translation without the right terminology

DGT Terminology Framework sets up the structure for terminology work and defines the main actors involved, but it is up to the Language Departments to decide how they want to organise their resources.

Terminology work: Main actors

Terminology Coordination Unit

- In charge of all multilingual and cross-language tasks

Terminologists

- Anticipating and fulfilling translators' needs

Translators

- Contributors and end-users of terminology

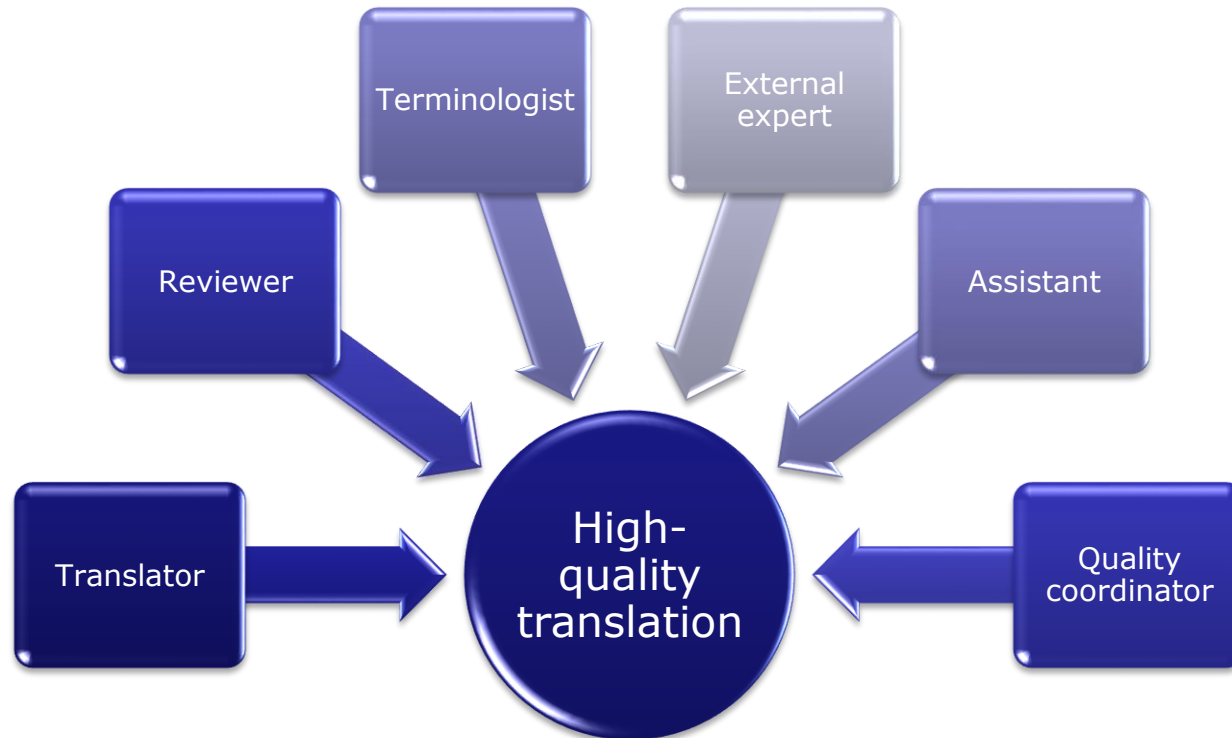

Managers

- Ensuring resources

Terminology matters

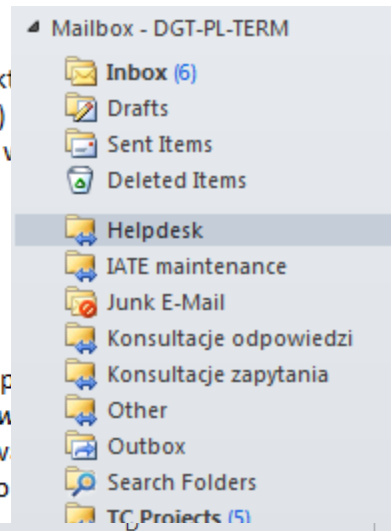

- *Misunderstanding of the rights and obligations on the part of citizens and companies*
- *Court cases at national or EU level*
- *Risk to legal certainty*
- *Discrepancies between language versions*
- *Damage to the image of the EU*

Translation as teamwork

Terminology work in PL LD

Hej, mam kłopot z terminem "two-days ahead market". Znalazł się on w dokumencie COMP-2015-01429-00-13, kt do tłumaczenia z terminem na dzisiaj. Znałe mi są oczywiście pojęcia rynek dnia następnego (day ahead market) day market), ale nigdzie w internecie nie znajduję odpowiednika "two-days ahead market". Możliwe, że to jakiś w władz, ale w prasie nic na ten temat nie znalazłam.
Może Tobie coś przyjdzie do głowy albo ktoś w dziale 2, kto zna się na energetyce, pomoże?

pl COM

Definition: niekorzystne warunki do wzrostu spowodowane przez czynniki niezwiązane z obecnością organizmów żywych

Criteria for translation choices

DGT Translation Quality Guidelines

Terminology must be internally and externally consistent, i.e. it must be used coherently within the act itself (without synonyms or reformulations) and in line with any basic act(s) and any parallel acts. New terms should be created only as a result of a conceptual analysis. The conceptual scope of the terms must remain unchanged. In view of the special nature of EU law, concepts or terminology specific to particular national legal systems are to be used with care.

Thank you
